

## **INSTRUCTIONS**

This sheet is used by students to self-evaluate their participation in oral interaction. One sheet is used eight times.

Students write in the date each time. Then they use the legend at the bottom of the page. They put a large dot in the box that matches their performance. For example, for #1 (I understand what was said), they put a dot in the top box if the answer is “yes,” in the middle box if the answer is “sometimes” and in the bottom box if they answer is “oops...” They connect the dots to chart their performance.
